

Product Features & Sizes

Zafety Lug Lock® is produced in an ISO-9001-2008 certified facility. Zafety Lug lock® units are formulated from design-engineered plastic. The formulation was developed to withstand extreme changes in temperature and to address high temperature environments created by frequent stop vehicles, typically public transportation vehicles (city buses) and refuse trucks. The Zafety Lug Lock® formulation is designed to withstand continuous operating temperatures from -40 degrees Centigrade (-40°F) to +160 degrees Centigrade (+320°F).

	# of Studs	Spacing		Nut Size		Part #	Application NA – North America, AU/NZ - Australia/New Zealand, UK/EU - United Kingdom/Europe
